

Geldof is a **leading supplier with global references** for storage tank projects for oil, petrochemicals and biochemicals, and other bulk liquids.

The storage tank solutions range from the delivery of individual **storage tanks** to the erection of large and fully equipped storage **tank terminals**, as well as everything in between. Geldof also offers comprehensive programs for **tank maintenance**.

Tank maintenance solutions

Our scope of supply...

Geldof offers project-based and contract-based tank repair and maintenance solutions, ranging from advisory services to all the standard mechanical, civil, electrical and environmental tasks all according to EEMUA 159, API653 or other norms and standards.

- Inspection, engineering design and advice
- Maintenance and sanitation of foundation structures, wells and dams, roads and concrete
- Repair or replacement of tanks (bottoms, shells, floating or fixed roofs), ladders and platforms
- Jacking and relocation of tanks
- Cleaning, blasting and painting (coating, lining, et cetera)
- All piping activities including process and utility piping, fire safety systems, subsoil piping
- E&I and automation
- General infrastructure

Renewal of tank bottom

Replacement of shell

Installation of various tank accessories on tank

Protection and finishing touches

“We commit to long-term partnerships with our customers, by providing excellent maintenance services.”

...your benefits

- Geldof is a **reliable** partner, defined as much by its brainpower, engineering competency and project management methods as by its effective organization in its shop as well as on site and its successful implementations.

└ Numerous references illustrate Geldof's proven track record of success

- Geldof provides full scope maintenance services and functions as a **single point of contact**. Customers are relieved of the task of dealing with myriad contacts and worries.
- Geldof offers a highly competent total tank maintenance organization, in which projects and programs benefit from the most advanced engineering tools and techniques – cleaning, cutting, jacking, repair and surface treatment of tanks, and the integrated management and execution of all peripheral works. Its proven processes and procedures guarantee the **on-time delivery of durable solutions using flexible and sustainable methods**.

Geldof is a leading supplier of 'integrated steel solutions' for the storage, handling and processing of bulk solids, liquids and gases. We have a strong reputation in the fabrication of storage tank solutions, dry bulk storage and handling projects, pressure vessels and process equipment, and a range of other engineered solutions that often require a combination of high-level competencies in diverse technical areas.

Geldof has extensive expertise in renewable and conventional energy, storage and transshipment, and serves the oil and gas industries as well as a broad range of other industries.

Engicon nv (Geldof) is part of the **Engicon Group**.

└ Refurbishment of tank pit

└ Increasing storage capacity

└ Retrofit of storage tanks (new nozzles, blasting, insulation, etc.)

└ New foundation

└ Installation of new roof

└ Jacking
